LONG'S GLADIOLUS BULBS

Annual Fall Sale

Digging Time Prices..1942

Sizes of Glad Bulbs

The **LARGE BULBS** measure (in diameter) from 1 1/4 inches up, mixed sizes. (Part No. 1 and part No. 2 sizes.) This size is designated by the letter "L".

MEDIUM BULBS measure 3/4 inch to an inch or larger, mixed sizes. (Part No. 3 and part No. 4 sizes.) These Medium Bulbs bloom splendidly, though the large bulbs make still larger spikes and more of them. Medium bulbs are designated by the letter "M".

NOTE: If sold out No. 1 size, we may send all No. 2 for Large, but more of them. If out No. 3, will send all No. 4 but more of them. Usually have enough so can send as noted above, however.

Prices, Terms, Delivery

Gladiolus prices are guaranteed for this fall only—until our spring catalogue is mailed in January. Many of these offers will be withdrawn altogether in January.

Each item on your Glad order must amount to not less than 10c.

TERMS: Cash with order, or 1/4 cash with order, balance C. O. D. Or send 1/4 with order and balance any time before shipment.

DELIVERY: (Except wholesale lots.) We pay all postage or express charges, and guarantee safe delivery. (Our choice, whether parcel post or express.)

If your express office is different from your mail address, please be SURE to give express office address also when ordering.

If order part from wholesale list and part from prepaid lists, you will find it much to your advantage to do as many others have done. Just say, "Send all at my expense and add more Glads to COVER SENDING COSTS ON PREPAID ITEMS."

Express is often cheaper than parcel post, as bulbs take a special low rate by express.

A New Super Glad

"New Zealand Splendor"

(Originated by W. R. Toon, New Zealand)

Probably the best Glad introduced into U.S.A. from New Zealand.

The plant and spike sturdy and strong. Blooms large. Many open. A crooked spike or misplaced bloom "very unusual".

The color is medium pink, with throat blotch of orange-scarlet. The shade varies somewhat, depending on soil and weather.

The florets set close to the spike, and are well faced and spaced. They look you right in the eye.

1942 Fall Glad Prices

We do not say that Glad prices in this folder are lower than we may list the same varieties next spring.

But unless all signs fail, Glad bulbs will have to bring more money than formerly, or commercial growers will have to quit. You will learn more about this from other growers and dealers.

Account labor shortage most of us large growers cut down our plantings last spring. And now that the labor situation has become so much more serious, the chances are that many bulbs will never be dug, but will be left in fields to freeze.

So it is not a matter of price so much as whether the supply will equal the demand. I may be wrong, and hope I am. But in the language of a favorite radio commentator, "And that's the top of the news as it looks from here, ladies and gentlemen."

A sane suggestion is that you buy PART of your Glads this fall anyway. There is no ceiling on Glad prices, nor any floor under them. We are all guessing. In these times, a situation can change over night. We really don't care for many Glad orders this fall ourselves, believe it or not.

Our FALL Glad orders will be filled with our usual liberal overcount on all items that we have in good supply, as before. Do not know now whether we can continue this through the winter and spring season or not.

NOTICE: Orders we receive this fall will be booked subject to crop. All we can guarantee is your "priority right". We hope to fill orders complete, but at this writing, (September) can not tell how the crop will turn out nor whether we can get help enough to save it all.

No orders booked without at least 25% payment with order.

Only the kinds, sizes and quantities listed in this folder are offered this fall. Please do not write asking if we will have this or that later. What we will have in addition, if any, will be listed in our 1943 SPRING catalogue, ready for you last of January.

JD Sez, Sez 'e—

Today (July 13, 1942) my son, Everett C. Long, joins Uncle Sam's Enlisted Reserve Corps of the Army Air Force.

First eight weeks of study and flying will be here at Boulder. Classes at University of Colorado. Flying at local Airport a few miles east of town.

Anticipating this enlistment, Everett has been taking private flying lessons at his own expense the past few months, even buying a plane in order to speed up hours in the air.

As many of you know, Everett has been associated with me in our garden and mail order work since graduating from University of Colorado in 1934.

I had dreams of his taking over more and more of my work, so that I could slow down and serve largely in an advisory capacity, and put in shorter hours. I've put in 42 years hard labor here in Boulder, and am no longer a glutton for work.

Now, instead, it is I who am taking over an extra job. Not complaining, you understand. This is my contribution towards helping win the war.

Everett might have been deferred for some time, but he didn't wait for Uncle to say, "Come hither." He volunteered, with approval and blessing of Mrs. Long, myself and his wife, Anne.

It is my thought that by telling you, our customers and friends, the situation, you will understand why we may not always give our usual sudden service, nor answer inquiries in detail, if at all.

Some of our best employees have also gone into the service, which adds still more to the work and worry of us who are left to carry on.

Our plan is not to ask for more business than our smaller experienced crew can take care of satisfactorily.

P. S. Since the above was written, Everett has passed all tests with excellent grades, flying and in classes here at Boulder.

He is now taking additional work in flying and study. Any more data might be giving military secrets.

A FEW IRIS POINTERS

If plant Iris late in fall, then cover plants with brush, cornstalks, tomato vines, excelsior, or any coarse material until early spring. This is to prevent alternate freezing and thawing in winter.

I usually protect my late Iris plantings simply by throwing a ridge of soil over the rows with a small hand plow, shovel or hoe, covering everything. In this case I cut the tops back nearly to the rhizomes, planting more like bulbs than plants. Very important to pack soil firmly about the roots and see that they enter the winter in the soil not dried out, though much moisture not needed or desirable. Level the soil early in spring.
